Wendy A. Marsh is the Chair of the Real Estate, Environmental & Land Use Planning Department. She concentrates on representing small and large businesses, manufacturers, contractors, lenders, borrowers, hospitals and educational institutions, in the areas of environmental, zoning and land use law. Ms. Marsh counsels clients on environmental compliance, including assisting on permitting, audits and defending clients in enforcement actions commenced by regulatory agencies including the United States Environmental Protection Agency (USEPA), U.S. Army Corps of Engineers, the New York State Department of Environmental Conservation (NYSDEC) and local environmental authorities. She also has extensive experience in assisting clients through environmental issues that arise during transactions and refinancing activities, which is often the trigger to uncover unknown environmental liabilities.

Ms. Marsh routinely assists clients through the myriad of remediation programs at both the state and federal level, including the Comprehensive Environmental Response, Compensation & Liability Act (CERCLA, or Superfund Program), Inactive Hazardous Waste Program (State Superfund Program), New York State Spills Program, Brownfield Cleanup Program and Voluntary Cleanup Program, as well as compliance with the detailed asbestos requirements in New York State Code Rule 56. She is involved in litigating cases in state and federal court on issues of liability and cost recovery for such remedial activities. Ms. Marsh also assists clients in compliance with the Occupational Safety and Health Act (OSHA).

Ms. Marsh represents clients on land use matters, such as zoning, planning and historic preservation laws. She assists municipal boards, counties and developers on compliance matters relating to applicable zoning laws, as well as compliance with the State Environmental Quality Review Act (SEQRA) and federal, state and local historic preservation laws.

Ms. Marsh represents both boards and developers in navigating through the local development approval process, including compliance with SEQRA. She also prosecutes and defends decisions made by the boards, through which she gains expertise in developing the best way to accomplish a client's goals, often without the need for costly litigation. She brings years of experience to this uniquely local area of law, which comes into play when clients are dealing with controversial projects, such as large-scale wind energy projects. Further, in order to withstand potential legal challenges, Ms. Marsh provides assistance with ensuring SEQRA compliance relating to all the individual components of the local approval process.

PRACTICE AREAS

- Environmental
- Government Relations
- Zoning & Land Use
- Health Care

- Education
- Municipal
- Labor & Employment
- Family Business Succession Planning

REPRESENTATIVE MATTERS

- Provided legal guidance to complete a large-scale development project involving numerous buildings in a historic district of Upstate New York. The legal work involved compliance with local development laws, SEQRA, State Historic Preservation Act, General Municipal Law, as well as all other aspects of the legal approvals needed for significant development activities. When challenged by a local opposition group, all approvals were upheld.
- Retained as special counsel by municipal boards to review large-scale commercial wind turbine projects throughout the state. This work can involve assistance in developing a wind ordinance to regulate wind projects, but the primary focus is to assist the town attorneys in achieving compliance with SEQRA in reviewing the project, as well as assistance in negotiating the related agreements, such as road use agreements and host agreements. Also assisted municipalities in asking for local legislation to regulate large-scale wind turbines.
- Retained to resolve environmental liabilities that arise in transactions. This work involves assessing and quantifying potential environmental liabilities, as well as developing the contractual structure to resolve those liabilities. Negotiated numerous environmental indemnification agreements, structured environmental escrow funds, and negotiated insurance contracts and other mechanisms to manage the environmental liabilities to allow a transaction to proceed.
- Regularly advise clients on the legal implications associated with environmental liabilities and the business implications associated with managing the risks.
- Frequently retained to resolve numerous OSHA violations with substantially lower penalties achieved as part of settlement negotiations.
- Often retained by local municipalities to assist in controversial and complex projects to ensure the decision of the municipal entity can withstand judicial challenge. These cases often involve controversial zoning decisions between feuding neighbors and/or responding to organized citizen groups. Based upon extensive experience, able to assist the municipal entity in understanding the underlying legal issues associated with the controversial project, the proper process to follow and steps to undertake to document the decision and to withstand legal challenges that the decision is not arbitrary and capricious. These decisions are then defended in court when challenged.
- Frequently represent numerous companies that handle, manage and transport petroleum. Particular expertise on the New York State Navigation Law when defending claims made by the Attorney General's Office commenced on behalf of the Oil Spill Fund. Involved in all aspects of Navigation Law litigation on behalf of clients.
- Frequently assist in advising on the obligations associated with owning and/or renovating property that has been deemed historic on the federal, state or local level. Regularly counsels owners on the true limitations associated with the property and educate the regulating authorities on the boundaries of such limitations in an effort to allow legal development of the properties.
